

FINANCIAL ANALYSIS, Evaluation and Budgeting

Course Introduction:

Successfully controlling finance requires the establishment and review of all aspects of procedures, authorization, reporting and monitoring of financial transactions. This course has been designed to provide delegates with practical approaches to financial management and control.

Many organizations fail to optimize business performance by not having clear strategies in place, not recognizing potential future problems so enabling pre-emptive action to be identified and captioned. This course considers the key facets of the business in order to create a planning framework for the future and so capitalize on the strengths of the business.

This course provides an overview of the benefits of using a balanced set of measures to evaluate the performance of a business or organization. It then teaches a process that an individual or team can use to develop a balanced scorecard for their business or organization. It also shows how a scorecard can be used as a management tool after it has been developed.

Course Objectives:

- Be able to review and improve financial controls
- Monitor key financial 'drivers'
- Assess the impact of contractual terms
- Reducing financial risk
- How to assess the current position
- Why businesses fail or fail to grow
- How do identify strategies
- How to plan for the key elements of the business
- Articulate the key factors to your success
- Organize them into categories
- Select measures to manage performance
- Establish goals for each measure
- Develop a data collection system
- Communicate what is important
- Make the measures meaningful to everyone in the company
- Evaluate, revise and redeploy

Who Should Attend?

All managers involved in any aspect of monitoring and improving business financial performance.
